Experience

Frontend Developer Guidepoint (January 2017 – Present)

- Developed key functionality of an always growing Angular 2+ application, and a legacy angular.js application (Angular 1.5).
- Created React applications for internal company business use.
- Worked on maintaining a large legacy PHP codebase.
- Individually developed an iOS app for employees and clients.
- Used Quality Assurance techniques using JIRA, BitBucket, and Confluence with designated QA testers.
- Gained promotion after just over 6 months on the job.

Frontend Developer 365 Media, Inc. (May 2015 – June 2016)

- Built designed websites for a growing corporation.
- Used HTML5 and CSS3 to build responsive websites in a professional setting in Silicon Valley, California.
- Worked directly with a designer, providing designs for every aspect of the website.

Projects

Finstagram September 2016 <https://github.com/jf-t/finstagram>

- Solely developed full stack application using Rails, React, Redux, SCSS, and PostgreSQL
- Implemented all technologies learned at App Academy.
- Utilized trello for ticket managing with my project manager.

CodeRnr October 2016 <https://github.com/kpam92/codernr>

- Worked in a pair to create a JavaScript code editor for the browser, with authentication and saving.
- Built Python API using Flask micro framework, along with PostgreSQL to create simple backend.
- Used responsive web design with correct git pair techniques to create working web application

Education

App Academy Web Development San Francisco, CA 2016

Accelerated 1000-hour full stack Rails web development course with a sub 3% acceptance rate. Topics include algorithms, JavaScript, coding style, REST, single-page apps, and other important web development practices.

Washington State University Computer Science Pullman, WA 2014-2015

Took courses in languages such as Python and C, as well as mathematics and logic. Left after two years (without a degree) to attend App Academy.

Skills

JavaScript  Angular 2+  React/Redux  Node.js  SQL  Ruby on Rails  HTML/CSS
